Optimising Research Database (myRDC) access is essential for all Macquarie University researchers. The myRDC system, which is being phased in from November 2023 to January 2024, will support the efficient management of research activities.

Instructions to researchers:

1. Acknowledge the changes to the myRDC system.
2. Ensure successful access to myRDC for all researchers.
3. Regularly check the myRDC system for updates.

On request, your research staff can provide assistance with the transition to myRDC. Please contact your research staff for further information.

Successful strategies for securing research funding include:

1. Identifying funding opportunities
2. Developing a strong proposal
3. Building a robust research team
4. Establishing partnerships
5. Engaging stakeholders

Research funding opportunities include grants from various sources such as the Australian Research Council (ARC), the National Health and Medical Research Council (NHMRC), and the European Union (EU).

Due to the COVID-19 pandemic, the ARC's Discovery Grant rounds have been postponed. It is expected that the next round will be announced in late 2023.

Researchers are encouraged to explore the ARC's website for the latest information on funding opportunities.

Researchers are also advised to consult the myRDC system for more detailed information on research funding.
