QUICK REFERENCE GUIDE

PURE RESEARCH MANAGEMENT SYSTEM

ENABLE AUTOMATED SEARCH FOR PUBLICATIONS

OVERVIEW

This guide explains how to enable automated search for publications in Pure Research Management System (Pure RMS). Enabling automated search ensures that the Pure RMS looks for your publications in online database systems.

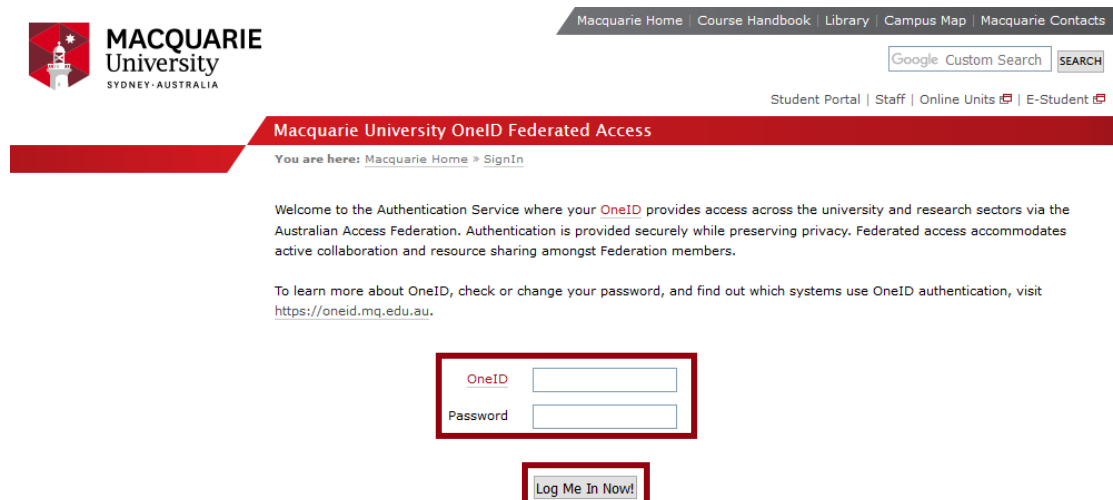

PROCESS

STEPS

1. Go to <https://goto.mq.edu.au/myresearch> and log in with your **OneID** and **Password**.

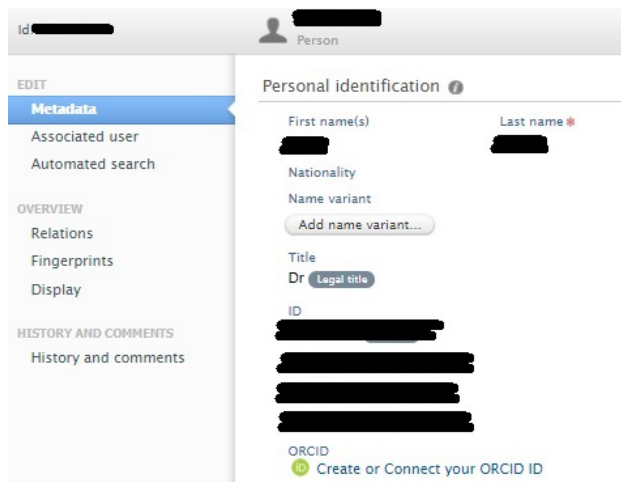

The screenshot shows the Macquarie University OneID Federated Access page. At the top, there are navigation links: Macquarie Home, Course Handbook, Library, Campus Map, and Macquarie Contacts. Below these is a Google Custom Search bar. The main heading is "Macquarie University OneID Federated Access". Underneath, it says "You are here: Macquarie Home > SignIn". The page contains a welcome message and a link to learn more about OneID. At the bottom, there is a login form with fields for "OneID" and "Password", and a "Log Me In Now!" button.

Note: Do not bookmark this page. Direct access to this page is not supported. To log into a particular service, please visit that service first.

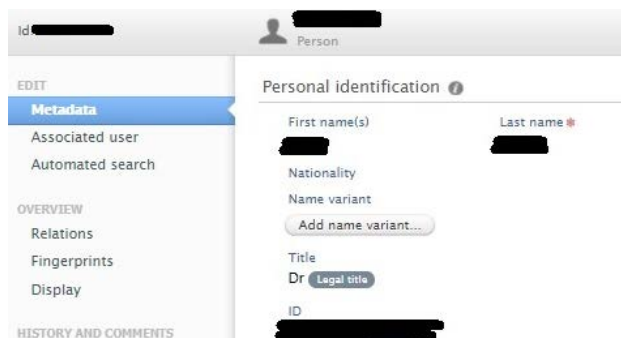

2. Click **Edit profile**.

3. Profile data opens in a new window.

4. Go to the upper left hand corner. Click **Automated search**.

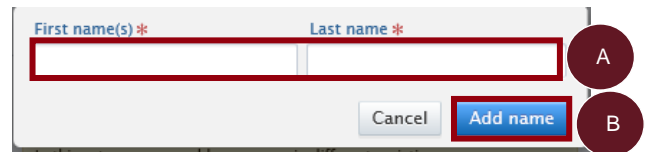

5. **Turn on** automated search for the desired database (Scopus, for example).

6. To add name variants, click **“Add Name”**. A pop-up box will be enabled.

A. Add your **First initial** and **Last name** in the respective fields. Scopus may suggest a name variant for your name. Review the suggestion and accept it.

B. Click **“Add name”**. The name variant will be added.

7. You must save all of these changes. Scroll down to the bottom of the page and click **Save**.
