### Purpose

*The Macquarie University Fauna Park stretches over 11Ha; and is committed to non-intrusive research. Induction is required To ensure the Health & Safety of all visitors and to assist Fauna Park Staff when required.*

### Guideline

**ISOLATED AREAS**

These are Controlled Environment Rooms (CER).

All CERs are isolated spaces but are not locked. They are normally entered / checked daily by staff and students in the course of normal activities.

Emergency Wardens have been trained to check inside each of these spaces in an evacuation.

**Buildings W19F 113 and W21B 101** have sound chambers.

These could be closed from the outside but cannot be locked and have handles to open them from the inside.

Emergency Wardens have been trained to check inside each of these spaces in an evacuation.

**Areas**: 2-3, 5-8, 10, 12-19, 21-28 and Sydney Turpentine Ironbark Forest

**(Vacant areas)**: 6-8, 15, 26-27 and Sydney Turpentine Ironbark Forest

These are mostly animal holding or plant growth areas but are isolated locations, in which it would be possible to for someone to collapse and not be seen by others.

Most animal holding areas are checked daily.

Snakebite is of concern, however students carry phones and can call for assistance.

*Snakebite kits are available.*
All Areas would need to be checked in the unlikely event of a complete evacuation of the entire Fauna Par.

Because of the large area, Emergency Services would need to coordinate this with the Fauna Park Manager to ensure correct key access and to protect the welfare of the animals.

Security, Critical Response Personnel and Academics will assist in searching.

These are all sheds or buildings in which it would be possible to for someone to collapse and not be seen by others.

All enclosed animal holding buildings are checked daily.

All buildings would need to be checked in the unlikely event of a complete evacuation of the entire Fauna Park.

Security would need to coordinate this with the Fauna Park Manager to ensure correct key access and to protect the welfare of the animals.

Critical Response Personnel and Academics will assist in searching.
