

## Play a video in an interactive slide

If you have YouTube clip or other online video clips you can add these as media slides in Echo360 Active Learning Platform. You can also create your own videos and upload it to your Library and insert it into a slide.

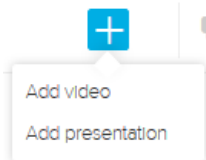

### To insert a media slide:

1. Login to iLearn and click on the **Echo360 Active Learning Platform block**.
2. Click on **New Class** to create a new class for each lecture.
3. Enter the details for the class.

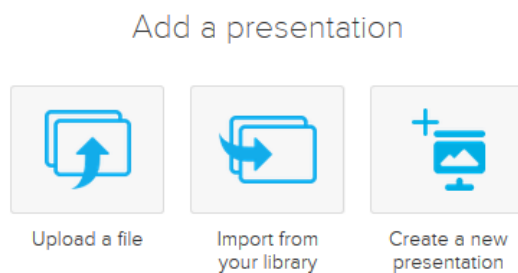

The diagram illustrates the initial steps of creating a new class. It begins with the 'Active Learning Platform' logo, which leads to a 'NEW CLASS' button. This button opens a 'New class' form with the following fields: Name (ALP Demonstration), Start Date (06/19/2017), Start time (10:00 am), Duration (2 hours), and a Description field. The form also includes 'CANCEL' and 'OK' buttons at the bottom.

4. Click on the **plus** sign in the row for the class and select **Add presentation**.

5. Chose from **Upload a file**, **Import from library** or **Create a new presentation**.

6. Click on **Add slides**.

7. Click on **Create a media slide**.

Create a media  
slide

8. Enter in the **URL name** and click on **Done**.
