VoiceThread Create Assignment - How to have students comment on the submissions of other students

The controls for this type of assignment are with the student so you will need to ask students to share their VT with class when they submit.

Finally, you need to allow students easy access to see their classmates’ submissions. The simplest way to do this is to create a second VoiceThread link and point it to the Course View. This will show students all VoiceThreads shared with this course, including the ones shared for the assignment.

How Students share their VoiceThread with the class
1. Go to your VT and click on Share with Class.

Create a Course View VoiceThread link
1. Click on the link for a new VoiceThread link.
2. Click on Course View.
3. All the VoiceThreads shared within this unit will be displayed.
